

What's going to be built?

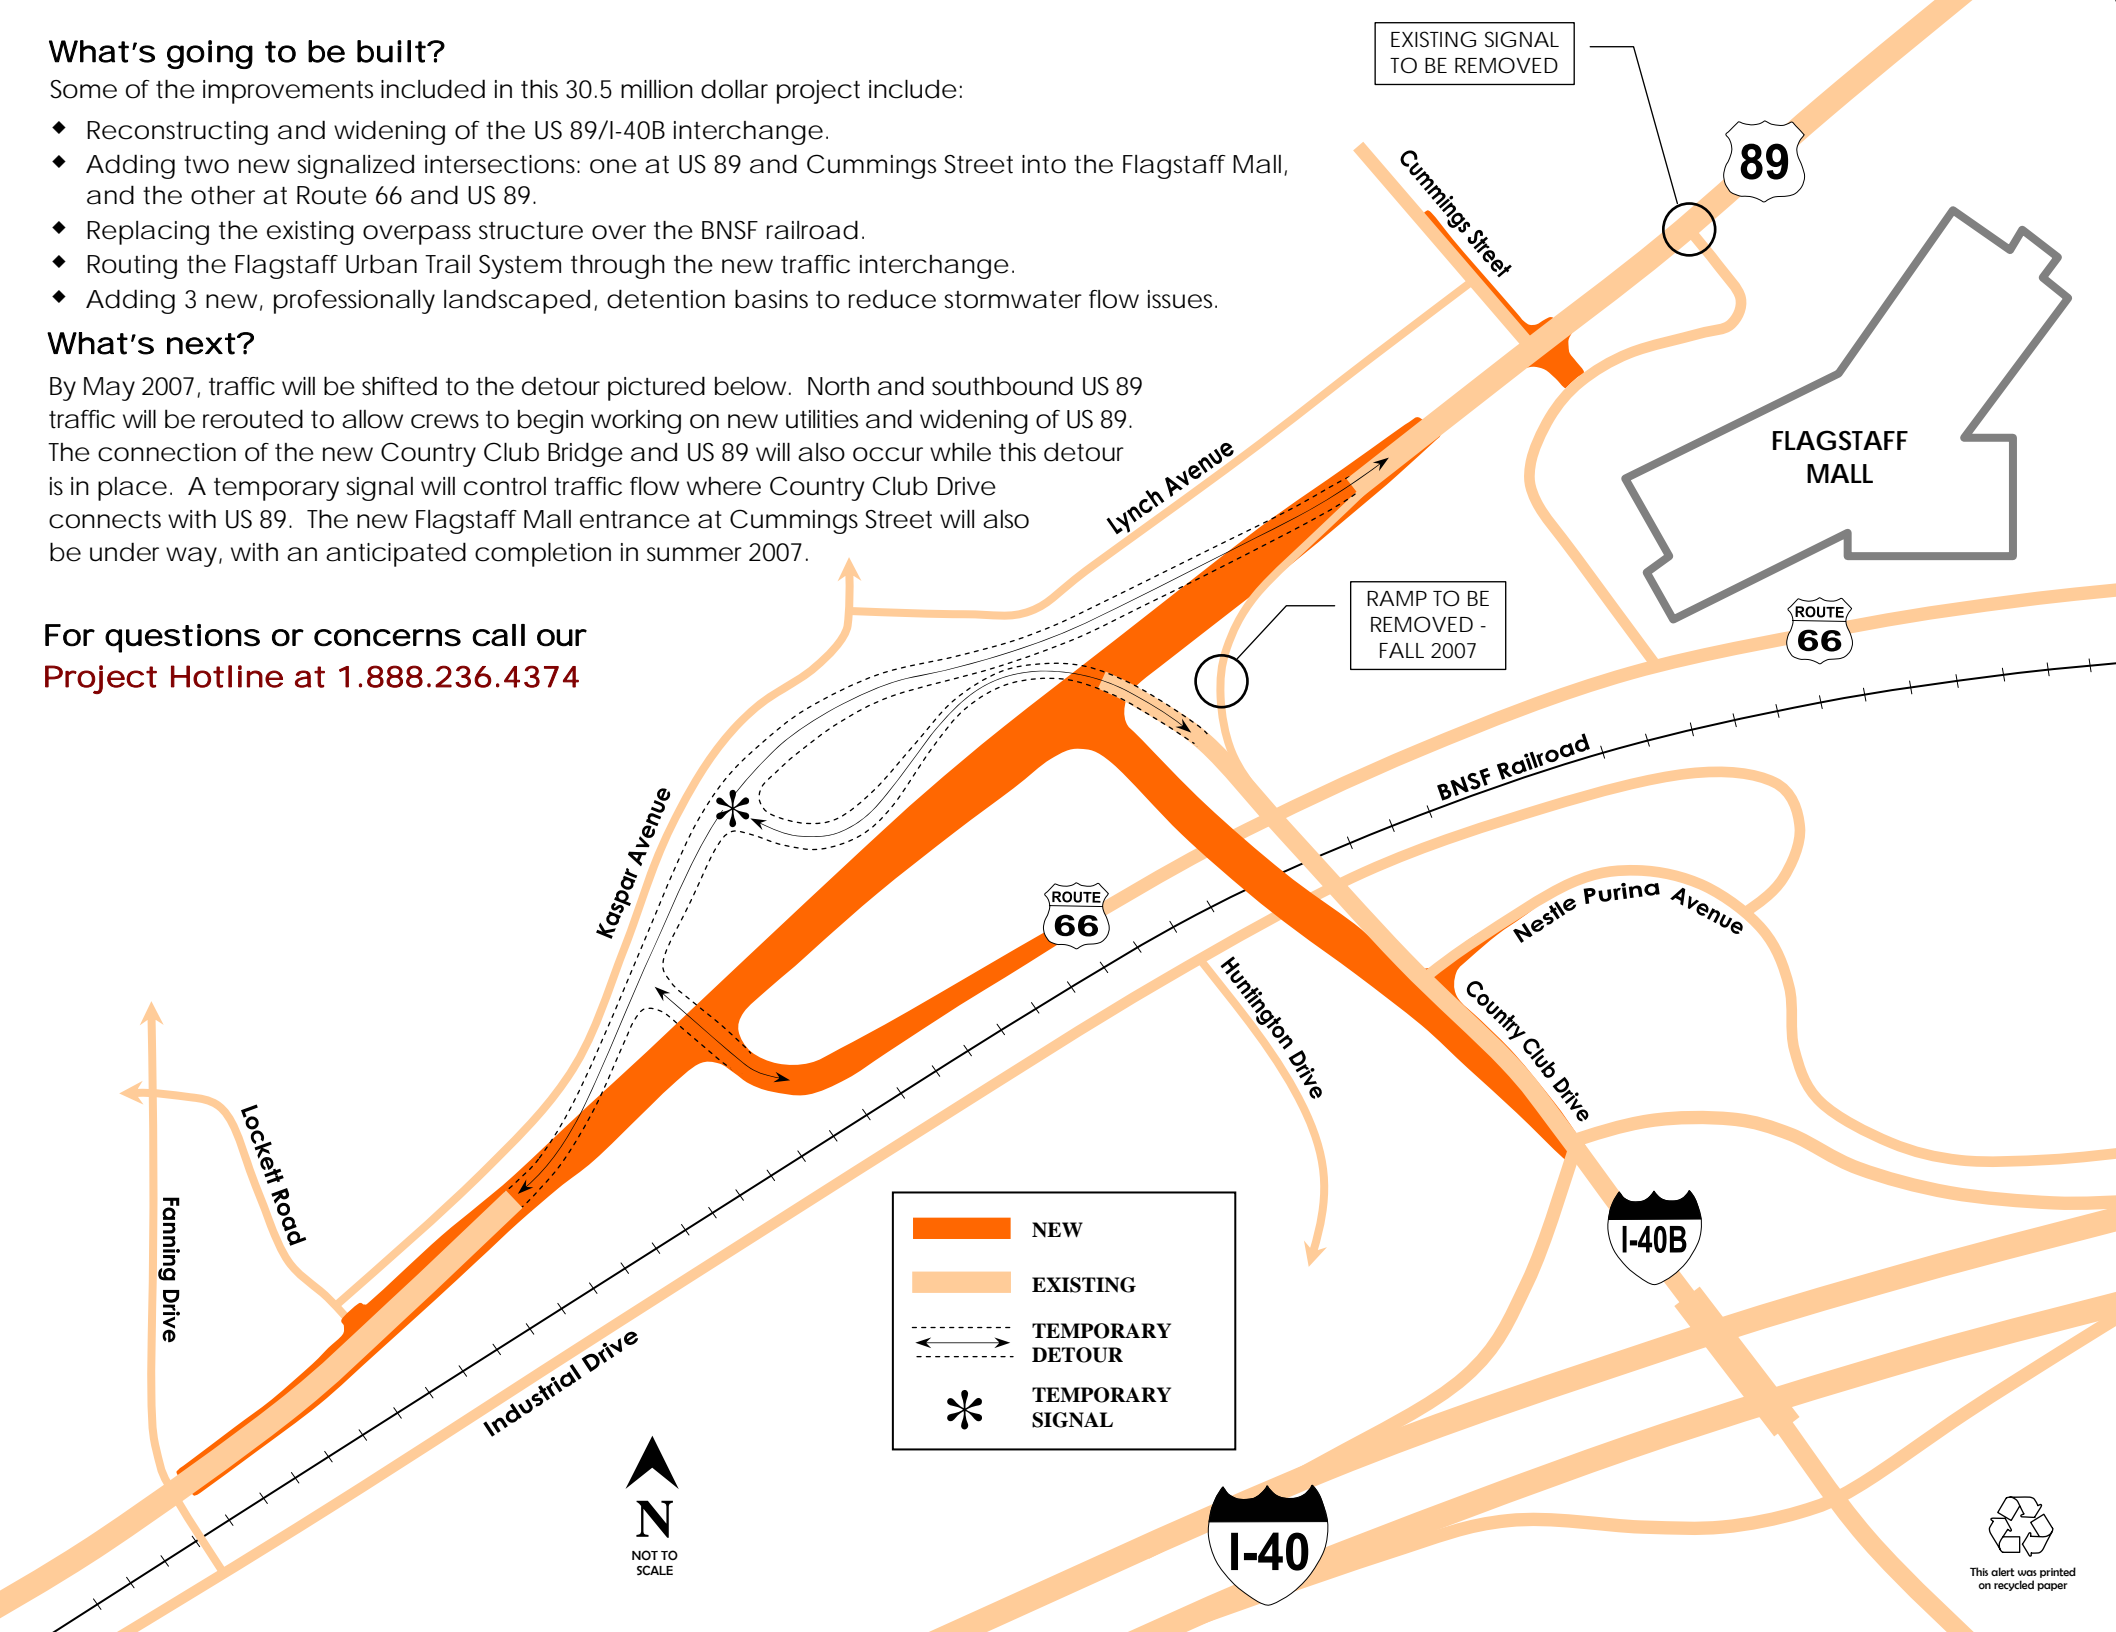

Some of the improvements included in this 30.5 million dollar project include:

- ◆ Reconstructing and widening of the US 89/I-40B interchange.
- ◆ Adding two new signalized intersections: one at US 89 and Cummings Street into the Flagstaff Mall, and the other at Route 66 and US 89.
- ◆ Replacing the existing overpass structure over the BNSF railroad.
- ◆ Routing the Flagstaff Urban Trail System through the new traffic interchange.
- ◆ Adding 3 new, professionally landscaped, detention basins to reduce stormwater flow issues.

What's next?

By May 2007, traffic will be shifted to the detour pictured below. North and southbound US 89 traffic will be rerouted to allow crews to begin working on new utilities and widening of US 89. The connection of the new Country Club Bridge and US 89 will also occur while this detour is in place. A temporary signal will control traffic flow where Country Club Drive connects with US 89. The new Flagstaff Mall entrance at Cummings Street will also be under way, with an anticipated completion in summer 2007.
